

Tig Torches GR 26

Special TIG Torches with non flammable SUPER FLEX rubber pipe

The line of TIG torches GR-17 and GR-26 are reported in use of special materials so that are achieved the biggest mechanic resistance as also the resistance in high temperatures.

At the same time it ensures the operator the biggest flexibility with the use of special flexible – non flammable rubber pipe of gas and current supply (MONOBLOCK).

The above mentioned advantages have established EVO torches in essential partner in rough works and big productive requirements (welding of natural gas pipes - refineries - industrial installations and constructions).

Is specifically provided the possibility of supply with all the standard and accessory parts for each special application.
